Author Activity

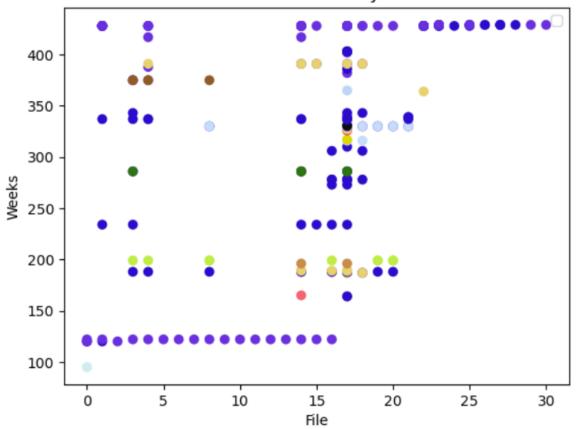

Top Contributors
- Scott Alexander-Brown (scottyab)
- Matthew Rollings (stealthcopter)
- Frieder Bluemle (friederbluemle)

Table Information
- There were 15 unique contributors recorded
- There were 31 unique files ending with the extensions .java, .cpp, .kt.

Notes
- The clone and branching features of git are incredibly useful and allow multiple contributors to develop features for a product independently of each other. The presentation of what is being changed when contributors attempt to merge their changes with the main branch is clear and easy to read.
- Viewing commit history with the git log command gives an interesting overview of larger projects like this one with many contributors as it gives us details about the commit history of the repository.
